

Assistance in getting the right amount of insurance cover for your contents

Completing the checklist.

The check list groups home contents into logical sections, all you need to do is estimate the value of your contents for each section and write it in. It is a good idea to use photographs to keep accurate records of your contents, these photo's along with the checklist should be stored away from the home. It is suggested that the list is reviewed periodically to include new items as they are purchased.

Valuable items

It is important to specify valuable items separately, particularly jewellery and works of art/antiques, as your policy may limit the amount covered for unspecified items, please contact your broker if you have any questions or refer to the policy wording.

CONTENTS CHECKLIST

Furniture

Dining Room \$ _____
